USER GUIDE

VBT3ASV1

SAFETY INFORMATION

About this user guide

Read this user guide completely before using the machine. Keep this user guide for reference. If you pass your machine on to third parties, it must be accompanied with this user guide. Failure to adhere to this user guide can lead to serious injuries or damage to the machine. We assume no liability for damage caused as a result of failure to adhere to this user guide. Important information not included in this chapter is indicated as follows:

WARNING: Warns of health hazards and identifies possible risks of injury.

CAUTION: Indicates possible dangers to the machine or other objects.

NOTE Highlights tips and information.

General usage

This stick vac is intended for household use only and NOT for commercial or industrial use.

- Only use the stick vac indoors on dry surfaces and keep the area you're cleaning well lit.
- Don't vacuum up hard or sharp objects such as glass, nails, screws, coins, etc.
- Don't vacuum up hot coals, cigarette butts, matches, or items that are burning or smoking.
- Don't use in an area that is wet or where there may be harmful fluids (chlorine, bleach and ammonia drain cleaner).

■ Don't attempt to remove blockages with sharp objects as this may cause damage to your stick vac.

■ Only Vax recommended charger, tools and accessories should be used with this stick vac and always check the floorhead and accessories are free from damage, dirt and debris before use.

■ Always turn off or unplug the stick vac from the charger before carrying out any maintenance. Please refer to the appropriate section in the user guide to review necessary precautions.

■ Always make sure the separator and filters are fitted correctly before using your stick vac.

■ Keep all openings clear and free from debris as this may affect the airflow/suction.

■ Take extra care when using the stick vac on the stairs.

WARNING: Always switch off the stick vac and unplug from the charger and mains before carrying out any maintenance or troubleshooting.

CAUTION: Don't over fill the dirt container to avoid blocking the air flow through the stick vac. For best cleaning results, empty the dirt container after every use. Filters should be tapped over a bin every 4-6 uses to remove dirt and debris and washed every 3 months. Filters should be replaced every 6-9 months depending on the level of use.

Safety

■ This stick vac can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the stick vac in a safe way and understand the hazards involved. Children must not play with the stick vac. Cleaning and user maintenance must not be made by children without supervision.

■ Keep fingers, hair and loose clothing away from moving parts and openings whilst using the stick vac.

■ Don't use the stick vac if it has been dropped, damaged, immersed in water or left outdoors.

■ Don't handle the charger plug or use the stick vac with wet hands.

■ Don't use the stick vac charger if the charger cord or plug is damaged.

■ Don't unplug the charger by pulling on the charger cord.

Power supply

WARNING: For the purposes of recharging the battery, only use the detachable supply unit provided with this appliance.

■ Don't charge the stick vac outdoors, or leave the charger connected to the mains when not in use.

■ Don't use the stick vac with the incorrect charger as this may result in damage or injury to the user. The correct charger information is listed on the ratings label.

■ Always use the charger supplied with the stick vac. If charging the stick vac through an extension cord, use only CE approved 13amp extension cords, non-approved extension cords may overheat. Care should be taken to arrange the extension cord as it can be a trip hazard.

Brushbar

WARNING: The brushbar in the powered head constantly rotates when switched on. Never use the powered head on one spot for an extended period of time as the brushbar may damage the floor surface. Always turn the powered head brushbar off when cleaning hard floors. To prevent any damage being sustained, test on an inconspicuous area of the flooring first.

CAUTION: If the brushbar in the powered head has been obstructed, the brushbar motor protection sensor may have been activated. The brushbar will stop and the light on the powered head will illuminate red. To reset switch the brushbar and stick vac off, remove the powered head from the reach wand/handheld and clear any obstruction. Wait 1 minute before refitting the powered head tool, switch the stick vac on and press the brushbar ON/OFF button.

Storage

■ Store your stick vac in a cool, dry area. If filters have been cleaned as per user guide instructions ensure they are thoroughly dry before storing away. This stick vac does not stay upright without constant support. Between uses, lie flat on the floor in a suitable location so that it does not become a trip hazard or can be stepped on.

Battery and Disposal

CAUTION: The battery used in this device may present a risk of fire or chemical burn if mistreated. Do not disassemble or heat above manufacturer's maximum temperature limit (60°C/140°F) or incinerate. Use of another battery may present a risk of fire or explosion.

■ The battery must be removed from the appliance before disposal and the used battery disposed of safely and promptly. Keep away from children. Prior to disposal, protect exposed terminals with heavy insulating tape to prevent shorting. The battery is to be disposed of safely at your local battery recycling centre.

■ Do not attempt to disassemble the battery, remove any component projecting from the battery terminals and do not dispose of in a fire. The battery and charger have no user serviceable parts. Fire or injury may result.

■ The appliance must be disconnected from the mains supply before use or when removing the battery before disposal. In case of battery leakages avoid any contact with the skin and contact 0800 092 7737.

PLEASE KEEP INSTRUCTIONS FOR FURTHER USE

WELCOME TO VAX

Thank you for buying the Vax BLADE 2 MAX, we hope you enjoy using your new product.

This user guide will help you get the most out of your machine and gives advice on maintenance and cleaning.

WARRANTY

If a Vax machine is used in the way it is intended and it breaks down within the guarantee period, it's our responsibility to repair or replace it. Here's what isn't covered:

- Normal wear and tear of consumable items, for example: belts, filters, brushbars, fuses etc.
- Batteries or rechargeable batteries which have become faulty or have a reduced service life as a result of normal wear or improper handling.
- Accidental damage
 - Damage as a result of use not in accordance with the product user guide.
 - Damage caused by not carrying out regular maintenance.
 - Damage to cable.
 - Blockages caused by misuse.

- Faults caused by:
 - Negligent use, misuse, neglect or careless operation of the machine;
 - Use of the vacuum cleaner which is not in accordance with the user guide.
 - Use of a Vax product for anything other than normal domestic household purposes in the country in which it was purchased.
 - Use of parts, accessories and consumables, which are not genuine Vax components.
 - Faulty installation or repairs – unless carried out by a qualified electrician or engineer.

TECHNICAL

EU Statement of Compliance: Manufacturer/EU importer: Vax Limited, hereby on our own responsibility, declare that the Vax BLADE 2 MAX is manufactured in compliance with the following Directives:

Safety: 2014/35/EU Low Voltage Directive.

EMC: 2014/30/EU Electromagnetic Compatibility Directive.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

© 2018 Vax Limited. All rights reserved. The VAX trade mark and Vax lozenge are the property of Techtronic Floor Care Technology Ltd and are registered in the EU and may be pending or registered in other countries.

GETTING TO KNOW YOUR MACHINE

Fig. 1

- A. Carry handle
- B. Dirt container
- C. Dirt release button
- D. Filter cover and filter
- E. Dirt container release latch
- F. Battery level indicator light
- G. Boost button
- H. Brushbar ON/OFF button
- I. ON/OFF button
- J. Charging port
- K. Reach wand
- L. Powered head
- M. Brushbar
- N. Charger
- O. Wall mount, 2 screws and wall plugs
- P. Crevice tool storage caddy

Contents Fig. 2

- A. Crevice tool
- B. Dusting brush

Unpacking and assembly

1. Unpack the contents and check they are complete. (Fig. 1 and 2).
2. Attach the reach wand and powered head to the handheld. They will click when locked into place (Fig. 3).
3. Push the crevice tool storage caddy onto the reach wand and slot the tool into place (Fig. 4).

Attaching the wall mount

1. Without the handheld attached to the reach wand and powered head, push the wall bracket onto the top and back of the reach wand. (Fig. 5/1).
2. Choose a location for the stick vac to be stored, preferably near to a mains supply although not directly above or below a mains socket. Stand the stick vac powered head and wand against the wall, ensuring the powered head is flat on the floor.

3. Holding the wall bracket securely against the wall, use a pencil to make a small mark for each screw. (Fig. 5/2) Use the screws and wall plugs to secure the wall bracket to the wall.
4. The charger cord and dusting brush can be fitted onto the wall bracket (Fig. 6).
5. Fully assemble the stick vac and firmly press the stick vac into the wall bracket to secure. Always ensure the stick vac is securely locked into place.

Charging the stick vac

NOTE The initial charge is 3 hours and charging will be required before first use. Failure to fully charge the battery before first use may result in poor battery performance. The life expectancy of the battery will vary depending on the usage of the stick vac.

1. To charge the stick vac, securely attach the stick vac into the wall bracket. You can also charge as a handheld; detach the stick vac from the reach wand and tools, and place on a flat, stable surface.
2. Insert the charger lead into the charging port (Fig. 1/J) located on the carry handle of the handheld and plug the charger plug into the mains.
3. The battery indicator level lights will illuminate in turn as the battery charges, until all four lights are illuminated (Fig. 7/1 and 7/2) Once fully charged, the lights will go out. If charging for the first time the initial charge time is 3 hours.
4. When the stick vac is in use the battery level indicator lights will illuminate indicating how much charge is remaining.

When less than 20% charge is remaining the bottom light will flash red indicating the battery is running low and charging is required (Fig. **7/3**).

Using the stick vac

 **WARNING:** The brushbar in the powered head constantly rotates when switched on. Never use the powered head on one spot for an extended period of time as the brushbar may damage the floor surface. Always turn the powered head brushbar off when cleaning hard floors. To prevent any damage being sustained, test on an inconspicuous area of the flooring first.

 **CAUTION:** If the brushbar in the powered head has been obstructed, the brushbar motor protection sensor may have been activated. The brushbar will stop and the light on the powered head will illuminate red (Fig. **18**). To reset switch the brushbar and stick vac off, remove the powered head from the reach wand/handheld and clear any obstruction. Wait 1 minute before refitting the powered head tool, switch the stick vac on and press the brushbar ON/OFF button.

1. Place your foot on the powered head (Fig. **8/1**) and pull the handle backwards to recline (Fig. **8/2**).

2. To switch the stick vac on, press the ON/OFF button located on the handle (Fig. **9/1**). The On/Off button and battery level indicator lights on the handle will illuminate (Fig. **7/2**).

3. To increase suction for particularly dirty areas that require additional cleaning boost mode can be activated (Fig. **9/3**).

4. To switch the brushbar on, press the brushbar ON/OFF button (Fig. **9/2**). The light on the powered head and the brushbar ON/OFF light will illuminate when the brushbar is on and the brushbar will constantly spin. Press the brushbar ON/OFF button again to turn the brushbar off.

NOTE: The powered head brushbar should be ON for carpets and OFF for hard floors. Constant use of the boost mode and brushbar will reduce the battery run time.

5. All of the accessories, including the powered head can be attached directly onto the handheld (Fig. **10**) or the reach wand. The crevice tool and dusting brush can be used for hard to reach places and at different heights for above floor cleaning.

MAINTAINING THE STICK VAC

 **WARNING:** Always switch off the stick vac and unplug from the charger and mains before carrying out any maintenance or troubleshooting.

Removing and refitting the dirt container

1. Push down the latch on the dirt container (Fig. **11/1**) to release, tilt and lift to remove the dirt container from the stick vac. (Fig. **11/2**).

NOTE: Before refitting, if the lid of the container with separator has been removed for cleaning make sure the separator has been locked into place (Fig. **13**).

2. To refit, line up the dirt container connection with the stick vac handle (Fig. **12/1**). Press the dirt container release latch (Fig. **12/2**) and push the dirt container onto the stick vac. Release the dirt container latch to lock the dirt into place.

3. When correctly fitted all 3 connection points will be aligned and will sit flush (Fig. **13**).

Emptying the dirt container

1. Push down the latch on the dirt container (Fig. **11/1**) to release, tilt and lift to remove the dirt container from the stick vac. (Fig. **11/2**).

2. Hold the dirt container over a bin and press the dirt release button to allow dirt and debris to fall out. (Fig. **14/1 & 2**).

3. To close, push the dirt release door until it locks into place (Fig. **14/3**).

CAUTION: Don't over fill the dirt container to avoid blocking the air flow through the stick vac.

For best cleaning results, empty the dirt container after every use. Filters should be tapped over a bin every 4-6 uses to remove dirt and debris and washed every 3 months. Filters should be replaced every 6-9 months depending on the level of use.

Cleaning the filter and separator

1. Empty the dirt container (Fig. **14**).

2. Push the tab on the lid of the dirt container to access the filter (Fig. **15/1 & 2**). Lift the filter cover and separator from the dirt container (Fig. **15/3**).

3. Tap the separator over a bin to remove dirt and debris and wipe over the metal shroud with a dry cloth (Fig. **16/1**).

4. Pull the tab on the filter to remove from the separator (Fig. **16/2**). Tap the filter against the bin to remove any dirt and debris (Fig. **16/3**).

5. Wash the filter under running water (40°C max) (Fig. **17**). Leave for at least 24hrs or until fully dry before replacing.

Cleaning and replacing the powered head brushbar

1. Using a coin, push and turn the brushbar lock anticlockwise to release the brushbar (Fig. **19/1**).

2. Pull the brushbar out from the brushbar housing (Fig. **20/1**).

3. To remove any threads or hair, slide the blade of a pair of scissors into the groove on the brushbar and cut along the groove. Clear any dirt/debris from the end caps and inside the housing of the powered head (Fig. **21**).

4. Refit the brushbar (Fig. **20/2**) and turn the brushbar lock clockwise to lock (Fig. **19/2**).

Removing and replacing the powered head belt

1. Using a cross head screwdriver, unscrew the 3 screws and remove the cover (Fig. **22/1**).

2. If the belt is broken, remove the old belt and clean any debris from the cogs. To replace the belt firstly hook the belt over the small cog. Slide the belt over the top of the large cog and rotate the belt and cog anticlockwise. During rotation the belt will slide onto the cog (Fig. **22/2**)

3. Refit the belt cover and tighten the screws to secure.

Checking for blockages

1. Press the handheld release button and remove the reach wand. Check and clear any dirt and debris from the handheld connection point and the bin inlet. (Fig. **23/1**)

2. Check the powered head for any blockages and use a blunt object to remove the blockage. (Fig. **23/2**)

3. To test for a blockage in the reach wand, drop a small ball of paper into the wand. The paper will drop through if the wand is clear. Use a broom handle or similar blunt object to remove any blockage (Fig. **23/3**).

TROUBLESHOOTING

There is an accessory missing

Check the contents (Fig. **2**)

Why does the stick vac have no power?

■ The stick vac may need recharging. Go to **Charging the stick vac**.

■ The motor thermostat may have tripped. Empty the dirt container and check for blockages. Clean the filters and allow the stick vac to cool for approximately 1 hour. If you have washed the filters, wait 24 hours to fully dry before placing back on the stick vac.

Why won't the stick vac pick up?

■ The dirt container may be blocked. Check the dirt container and hand held inlet for blockages.

Go to **Emptying the dirt container**.

■ The filters may be clogged. Go to **Cleaning the filter and separator**.

■ There maybe a blockage. Go to **Checking for blockages**.

■ The brushbar on the powered head has not been activated. Go to **Using the stick vac**.

■ The powered head may be blocked. Go to **Cleaning and replacing the powered head brushbar**.

■ The stick vac, powered head and reach wand may not be correctly fitted. Go to **Unpacking and assembly**.

Why is there a red light on the unit?

■ Battery charge is running low (<20%). Go to **Charging the stick vac**.

Why is there a red light on the powered head?

■ The powered head brushbar has been obstructed. Go to **Cleaning and replacing the powered head brushbar**.

Why won't the powered head turn?

■ The brushbar on the powered head has not been activated. Go to **Using the stick vac**.

■ The tool/brushbar may be obstructed. Go to **Cleaning and replacing the powered head brushbar**.

■ The stick vac, powered head and reach wand may not be correctly fitted. Go to **Unpacking and assembly**.

■ The belt on the tool may be broken. Go to **Removing and replacing the powered head belt**.
