**SAFETY AND WARNINGS**

**WARNING!**
Electrical shock hazard
Before installing the dishwasher, remove the house fuse or open the circuit breaker. This appliance must be earthed. In the event of a malfunction or breakdown, earthing will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-earthing conductor and an earthing plug. The plug must be plugged into an appropriate outlet that is installed and earthed in accordance with all local codes and ordinances. Failure to follow this advice may result in electrical shock or death.

**WARNING!**
Electrical shock hazard
WARNING- Improper connection of the equipment-earthing conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if you are in doubt as to whether the appliance is properly earthed. Do not modify the power supply plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use an extension cord, adapter plug or multiple outlet box. Failure to follow this advice may result in electrical shock or death.

**WARNING!**
Cut Hazard
Take care - panel edges are sharp. Failure to use caution could result in injury or cuts.

**IMPORTANT!**
SAVE THESE INSTRUCTIONS
The models shown in this installation guide may not be available in all markets and are subject to change at any time. For current details about model and specification availability in your country, please go to our website www.fisherpaykel.com or contact your local Fisher & Paykel dealer.
SAFETY AND WARNINGS

IMPORTANT SAFETY INSTRUCTIONS

• Installation of this dishwasher requires basic mechanical and electrical skills.
• Be sure to leave these Instructions with the Customer.
• Installation must comply with your local building and electricity regulations.
• At the completion of the dishwasher installation, the Installer must perform the Final Checklist.
• Remove all packaging materials supplied with the dishwasher.
• This dishwasher is manufactured for indoor use only.
• Ensure all water connections are turned OFF. It is the responsibility of the plumber and electrician to ensure that each installation complies with all Codes and Regulations.
• The dishwasher MUST be installed to allow for future removal from the enclosure if service is required.
• The switched power outlet must be outside the dishwasher cavity, so that it is accessible after installation.
• Care should be taken when the appliance is installed or removed to reduce the likelihood of damage to the power supply cord and hoses.

IMPORTANT SAFETY INSTRUCTIONS

• If the dishwasher is to be relocated from one installation to another it must be kept upright to avoid damage from water spillage.
• Make sure only new hoses are used for connection (supplied with the dishwasher). Old hoses should not be reused.
• Failure to install the dishwasher correctly could invalidate any warranty or liability claims.
• If the product is installed in a motor vehicle, boat or similar mobile facility, you must bring the vehicle, boat or mobile facility containing the product to the service shop at your expense or pay the service technician’s travel to the location of the product.
If the Drain hoses supplied are not long enough to reach your services, you must use a Drain Hose Extension Kit P/N 525798 which will extend the drain hoses by 3.6 m. The kit is available from the nearest Fisher & Paykel Authorised Service Centre or our local website listed at the end of this document.

CABINETRY DIMENSIONS

DD60DA | DD60DC
---|---
P | Inside height of cavity* | min. 820 | min. 820
Q | Inside width of cavity | 600 | 600
R | Inside depth of cavity | min. 560 | min. 560
S | Recommended height of adjacent cabinet space | 720 | 720
T | Height of toekick space* | 100-160 | 100-160

* depending on adjustment of levelling feet

Minimum clearances from adjacent cabinetry

- min. 13 mm clearance from a corner cupboard
- min. 2 mm clearance to adjacent cupboard door
Service Holes
Can be located either side of dishwasher, close to the rear face and the floor, as illustrated, for access to the water supply and drain.

- If the hole is through wood, make sure its edges are smooth and rounded.
- If the hole is through metal, ensure you fit the supplied Edge Protector to prevent damage to the power cord.

Water Connection
Recommended **COLD** (Maximum 60°C).

3/4” BSP (GB20) to suit flat washer.

Water Pressure
**Water softener models**
Max. 1 MPa (145 psi)
Min. 0.1 MPa (14.5 psi)

**Models without water softener**
Max. 1 MPa (145 psi)
Min. 0.03 MPa (4.3 psi)

Kosher requirements
Drains will need to be separated to satisfy kosher requirements. We suggest you confirm acceptability with your local rabbi in respect to kosher installations.

**IMPORTANT!**
The power outlet must be located in a cabinet adjacent to the dishwasher cavity.
220-240 VAC min. 9.5 A
MAXIMUM DISTANCE OF HOSES & CORD FROM CHASSIS EDGE

**LEFT HAND SIDE**
- Drain hoses - 2000 mm
- Inlet hose - 1650 mm
- Power cord (excl.plug) - 1650 mm

**RIGHT HAND SIDE**
- Drain hoses - 1800 mm
- Inlet hose - 1250 mm
- Power cord (excl.plug) - 1650 mm
NOW CHOOSE WHICH INSTALLATION METHOD (A) OR (B) IS MORE SUITABLE FOR YOUR CABINETRY...

RECOMMENDED METHOD (A) - SECURE WITHOUT DRAWER REMOVAL (FRAMELESS CABINETRY ONLY)

8 ATTACH SIDE MOUNTING BRACKETS
- Clip all four side mounting brackets into their slots using a flat-bladed screwdriver. Ensure they're securely fitted before sliding product into cavity.
- The mounting slots are in pairs, one on each side diagonally across the product. A bracket must match A slot and B bracket must match B slot.
- When fitting brackets, ensure the ends are not pushed down into the chassis.

9 PULL THROUGH HOSES & PUSH INTO THE CAVITY
- Initially level the product.
- You can raise or lower the product by twisting the feet. Then take care when pushing the product into the cavity that you do not bend the feet.
- As you push product in, pull through hoses and cord, ensuring they don't get kinked or twisted.
- Optionally attach the two top mounting brackets (x2). When fitting brackets, ensure the ends are not pushed down into the chassis.
**SECURE TO THE CABINETRY ON THE SIDES**

1. Open the drawer halfway. Using a flat bladed screwdriver, prise the grey rubber plug out of the trim moulding.

2. Replace the grey rubber plug back into the trim moulding and ensure the trim seal is facing forward.

3. Repeat for all four brackets.

**OPTIONALLY SECURE TO THE CABINETRY ABOVE**

The top mounting brackets will only bend upwards a maximum of 10 mm.

**AFTER SECURING, DEPENDING ON YOUR MODEL - REFER TO RELEVANT ‘FIT THE SUPPLIED TOEKICK PANEL’ STEP**

Using a small Philips screwdriver, screw through the trim moulding, securing the side mounting bracket to the cabinetry. Do not damage the rubber trim seal.
ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL

8 - B PULL THROUGH HOSES & PUSH INTO THE CAVITY

Initially level the product. When fitting brackets, ensure the ends are not pushed down into the chassis.

When you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

You can raise or lower the product by twisting the feet. Then take care when pushing the product into the cavity that you do not bend the feet.

9 - B REMOVE THE LOWER DRAWER

To prevent kinked hoses
Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.

Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.

Rotate the drawer clockwise (max. 90°) and rest on side.

Push drawer runners back in on either side.

Push drawer runners back in on either side.

Sit the drawer down
SECURE TO THE CABINETRY ON THE SIDES

For further adjustment, using the most appropriate length Hexagonal socket supplied, fully extend levelling feet up to required distance by hand.

Secure using two pairs of formed brackets. Repeat on the other side of the chassis.

Ensure product is level and aligning with cabinetry.

OPTIONALLY SECURE TO THE CABINETRY ABOVE

The top mounting brackets will only bend upwards a maximum of 10 mm.

REFIT THE DRAWER ONTO THE RUNNERS

Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

Lift or rotate anti-clockwise the drawer back onto the drawer runners on either side.

Pull the release tabs forward on both sides 100 mm. Ensure the tabs are fully pulled forward and click into place.

AFTER SECURING, DEPENDING ON YOUR MODEL - REFER TO RELEVANT ‘FIT THE SUPPLIED TOEKICK PANEL’ STEP
If after fitting, the drawer touches the floor with a full load, you need to remove more of the toekick panel:

1. Remove the lower drawer (see ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL - STEP 8 B: REMOVE THE LOWER DRAWER)
2. Remove the pins - use a pair of needle nose pliers to press the pin legs together and push back through the hole
3. Remove the panel, and cut off another section of the kick strip following steps 2-8 above.
4. Replace the drawer (see ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL - STEP 11 B REFIT THE DRAWER ONTO THE RUNNERS)
5. Continue from step 7 above.

FIT THE SUPPLIED TOEKICK PANEL - DD60DC MODELS ONLY

1. Where the toekick meets the bottom of the tub is the cut-off point.

2. Mark this point on the toekick with a pencil.

3. Lay the toekick face down on a chopping board or similar.

4. Score along the marked cutoff line with a knife.

5. Turn the toekick over and score along the same line.

6. Gently snap off the excess.

7. Smooth the edges with a file. Be careful of sharp edges.

8. Snap off the two end tabs.

9. Slide the toekick onto the mounting rails either side and screw the toekick onto the bottom of tub on either side.

IMPORTANT!
Do not overtighten screw.
THERE ARE TWO DIFFERENT PLUMBING AND DRAINAGE OPTIONS. CHOOSE WHICH IS MORE SUITABLE.

**DRAINAGE OPTION 1**
Dishwasher and Ø 38 mm Standpipe

- Screw Drain hose support to back wall at correct height.
- If space is limited for fixing, push hose through drain hose support to required height.
- min. radius 200 mm

**DRAINAGE OPTION 2**
Dishwasher using drain hose joiner onto sink trap/waste tee

- Screw Drain hose support to back wall at correct height.
- If space is limited for fixing, push hose through drain hose support to required height.

**IMPORTANT!**
Ensure that drain hose is installed as close to the underside of the benchtop as possible. This will ensure no waste re-enters the drain hose in the event of poor flow or a blockage in the plumbing.

Ensure the drain hose does not extend into water retained in the trap; an air gap is required to prevent waste water from siphoning back into the tub.

**IMPORTANT!**
Ensure that drain connection complies with local plumbing regulations.

- Ensure drain hose is routed straight to the joiner so that waste water does not accumulate in the hose.
- Remove excess drain hose material if necessary.
- Do not shorten the inlet hose.

Supplied drain hose joiner to suit 19 mm waste tee

Screw Drain hose support to back wall at correct height.
16 CONNECT INLET HOSE TO COLD WATER

Ensure the supplied rubber washer is fitted inside the coupling.

Tighten coupling with spanner.

17 PLUG PRODUCT IN

CONNECT INLET HOSE TO COLD WATER

18 TROUBLESHOOTING

- Excessive water remaining above the filter plate, after the rinse cycle. (This is displayed as an R3 fault)
  Check for a kinked drain hose, blocked waste connection, highloop not properly installed, drain hose not routed correctly or spray arms not in place.

- No water supply. (This is displayed as an R1 fault)
  Check water is connected and turned on.

- The dishwasher is beeping continuously
  There is a fault. See section ‘If there is a fault’ in the User guide for further information and instructions.

- No program indicator lights up when the drawer is opened
  Ensure power is connected and is switched on. If it is and still no indicator lights up, see the ‘Preference options’ section of the ‘Quick start guide’. An option called ‘Open drawer auto power-on’ may need to be turned on.

- Water around water supply and drainage connections
  Check connections, existing plumbing and hoses for leaks. Check rubber washer and hose clamp are correctly fitted.

- If product is tipping
  Ensure the product is secured to the cabinetry.

- If front panels are misaligned
  Check and relevel product. Unscrew the product from the cabinetry. Adjust the feet to level the product, then re-secure to the cabinetry. Check the cabinetry is square.

- Drawer doesn't close properly
  Ensure nothing is obstructing the drawer from closing properly eg hoses or drawer latches.

- If a problem occurs, consult the ‘Troubleshooting’ section of the User guide.

- If after checking these points you still need assistance, please refer to the Service & Warranty book for warranty details and your nearest Authorised Service Centre, or contact us through our website, listed below.
TO BE COMPLETED BY THE INSTALLER

☐ Check all parts are installed.

☐ Ensure that all panels and parts thereof are secure and final electrical tests have been conducted in accordance with local electrical regulations.

☐ Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The drawers must be free to fully close with no resistance from the cabinetry.

☐ Ensure inlet hose to water supply has supplied rubber washer fitted, and that it's tightened a further half turn after seal contact.

☐ Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.

☐ The drain hose joiner must not support the weight of excess hose material. Keep drain hose as fully extended as possible to prevent sagging. Any excess length of drain hose should be kept on the dishwasher side of the highloop.

☐ If connecting the drain hose to the sink trap, ensure the Highloop is a minimum 150 mm higher than the drain hose joiner.

☐ Ensure any packaging or tape securing the racks or spray arms is removed from the drawers.

☐ Water softener models only: adjust the water softener setting from the default setting to suit the water hardness of the area. See the Quick start guide and section 'Water softener' in the User guide.

☐ Turn on the power and water supplies, then open the drawers. You should hear a beep and see a program indicator light up on the control panel.

☐ Check the spray arms are in place, mounted correctly and free to rotate, by physically rotating by hand.

☐ Add three cups of water into the drawer. Press until the indicator of the 'Rinse' program lights up. Close the drawer and press to start the program. Repeat for the other drawer.

☐ After the Rinse program has finished, ensure the dishwasher has run and drained correctly.

☐ Check the water supply has correctly shut off and drainage connection for leakage.

NOW CHOOSE WHICH INSTALLATION METHOD (A) OR (B) IS MORE SUITABLE FOR YOUR CABINETRY...

**RECOMMENDED METHOD (A) - SECURE WITHOUT DRAWER REMOVAL (FRAMELESS CABINETRY ONLY)**

**ATTACH SIDE MOUNTING BRACKETS**

Clip all four side mounting brackets into their slots using a flat-bladed screwdriver. Ensure they’re securely fitted before sliding product into cavity.

The mounting slots are in pairs, one on each side diagonally across the product. **A** bracket must match **A** slot and **B** bracket must match **B** slot.

When fitting brackets, ensure the ends are not pushed down into the chassis.

**PULL THROUGH HOSES & PUSH INTO THE CAVITY**

As you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

**IMPORTANT!**

If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.
1 Open the drawer halfway. Using a flat bladed screwdriver, prise the grey rubber plug out of the trim moulding.

2 Using a small Philips screwdriver, screw through the trim moulding, securing the side mounting bracket to the cabinetry. Do not damage the rubber trim seal.

3 Replace the grey rubber plug back into the trim moulding and ensure the trim seal is facing forward.

Repeat for all four brackets.
ALTERNATIVE METHOD (B) - SECURE BY DRAWER REMOVAL

8-10 PULL THROUGH HOSES & PUSH INTO THE CAVITY

- Pull through hoses & push into the cavity.

9-11 REMOVE THE LOWER DRAWER

- Remove the lower drawer.
- To prevent kinked hoses:
  - Either sit the drawer down on the left hand side (recommended) or rotate the drawer clockwise, resting it on its side after removal.
- Press the release tabs in on either side and push back to release drawer from runners.
- Lift drawer off runners.
- Push drawer runners back in on either side.

IMPORTANT!
If product cannot be pushed in far enough, pull out again and rearrange hoses and cord. Do not use excessive force, as doing so may squash the hoses and lead to incorrect operation.

As you push product in, pull through hoses and cord, ensuring they don’t get kinked or twisted.

Lift drawer off runners.
Press the release tabs in on either side and push back to release drawer from runners. Lift drawer off runners.

Rotate the drawer clockwise (max. 90°) and rest on side.

Push drawer runners back in on either side.

Sit the drawer down.
The product has three pairs of fixing points:

1. Two pairs of formed brackets on either side of the chassis (use 16 mm screws)
2. A pair of fixing holes either side on the bottom (use 38 mm fixing screws & washers)

Before refitting the drawer, ensure the hoses are not twisted and the latches at the rear of each drawer runner are facing forward.

Lift or rotate anti-clockwise the drawer back onto the drawer runners on either side.

Pull the release tabs forward on both sides 100 mm. Ensure the tabs are fully pulled forward and click into place.
THERE ARE TWO DIFFERENT PLUMBING AND DRAINAGE OPTIONS. CHOOSE WHICH IS MORE SUITABLE.

**DRAINAGE OPTION 1**
Dishwasher and Ø 38 mm Standpipe

1. Screw Drain hose support to back wall at correct height.
2. If space is limited for fixing, push hose through drain hose support to required height.
3. Screw Drain hose support to back wall at correct height.
4. If space is limited for fixing, push hose through drain hose support to required height.

**DRAINAGE OPTION 2**
Dishwasher using drain hose joiner onto sink trap/waste tee

1. Screw Drain hose support to back wall at correct height.
2. If space is limited for fixing, push hose through drain hose support to required height.
3. Supplied drain hose joiner to suit 19 mm waste tee

**IMPORTANT!**
Ensure that drain hose is installed as close to the underside of the benchtop as possible. This will ensure no waste re-enters the drain hose in the event of poor flow or a blockage in the plumbing.

Ensure the drain hose does not extend into water retained in the trap; an air gap is required to prevent waste water from siphoning back into the tub.

**IMPORTANT!**
Ensure that drain connection complies with local plumbing regulations.

Ensure drain hose is routed straight to the joiner so that waste water does not accumulate in the hose. Remove excess drain hose material if necessary. Do not shorten the inlet hose.

Troubleshooting

- **Excessive water remaining above the filter plate, after the rinse cycle.** (This is displayed as an R3 fault)
  Check for a kinked drain hose, blocked waste connection, highloop not properly installed, drain hose not routed correctly or spray arm not in place.

- **No water supply.** (This is displayed as an R1 fault)
  Check water is connected and turned on.

- **The dishwasher is beeping continuously**
  There is a fault. See section ‘If there is a fault’ in the User guide for further information and instructions.

- **No program indicator lights up when the drawer is opened**
  Ensure power is connected and is switched on. If it is and still no indicator lights up, see the ‘Preference options’ section of the ‘Quick start guide’. An option called ‘Open drawer auto power-on’ may need to be turned on.

- **Water around water supply and drainage connections**
  Check connections, existing plumbing and hoses for leaks. Check rubber washer and hose clamp are correctly fitted.

- **If product is tipping**
  Ensure the product is secured to the cabinetry.

- **Drawer doesn’t close properly**
  Ensure nothing is obstructing the drawer from closing properly eg hoses or drawer latches.

- **If a problem occurs, consult the ‘Troubleshooting’ section of the User guide.**

- **If after checking these points you still need assistance, please refer to the Service & Warranty book for warranty details and your nearest Authorised Service Centre, or contact us through our website, listed below.**
CHECK ALL PARTS ARE INSTALLED.

Ensure that all panels and parts thereof are secure and final electrical tests have been conducted in accordance with local electrical regulations.

Ensure product is level, securely fastened to the cabinetry and opens and closes freely. The drawers must be free to fully close with no resistance from the cabinetry.

Ensure inlet hose to water supply has supplied rubber washer fitted, and that it's tightened a further half turn after seal contact.

Ensure any knockouts or plugs in drain connection have been drilled out and drain connection has been made.

The drain hose joiner must not support the weight of excess hose material. Keep drain hose as fully extended as possible to prevent sagging. Any excess length of drain hose should be kept on the dishwasher side of the highloop.

If connecting the drain hose to the sink trap, ensure the highloop is a minimum 150 mm higher than the drain hose joiner.

Ensure any packaging or tape securing the racks or spray arms is removed from the drawers.

Water softener models only: adjust the water softener setting from the default setting to suit the water hardness of the area. See the Quick start guide and section ‘Water softener’ in the User guide.

Turn on the power and water supplies, then open the drawer. You should hear a beep and see a program indicator light up on the control panel.

Check the spray arms are in place, mounted correctly and free to rotate, by physically rotating by hand.

Add three cups of water into the drawer. Press \( \text{ until the indicator of the ‘Rinse’ program lights up. Close the drawer and press } \) to start the program.

After the Rinse program has finished, ensure the dishwasher has run and drained correctly.

Check the water supply has correctly shut off and drainage connection for leakage.
