

HIGH-PERFORMANCE SECURE HARD DISKS

Experience advanced, automated protection and enable your HP printer or multifunction product (MFP) to do more.

Secure valuable information

HP offers two high-performance secure hard disk options, each with a cryptographic solution that secures information while maintaining printer or MFP throughput and performance. Advanced Encryption Standard (AES) reduces the risk of stolen data or lost productivity and helps provide assurance that your information is safe. AES technology ensures that the printer's secure hard drive data is not readable if the hard disk is removed from the device because the information is protected by encryption.

The U.S. and Canadian Cryptographic Module Validation Program (CMVP) validates cryptographic modules to U.S. Federal Information Processing Standards (FIPS) 140. In North America, HP provides a FIPS 140-2 option on the HP High-Performance Secure EIO Hard Disk. For more information, see

<http://csrc.nist.gov/groups/STM/cmvp/index.html>.

Protect your investment

Choose from two options, including an internal secure hard disk and an external (EIO) secure hard disk. Both of the HP High-Performance Secure Hard Disk options are an easy one-time installation, and once installed, your data is immediately protected by encryption. Device performance and reliability are not impacted.

Easily install and manage

Protecting information on your current HP device doesn't have to be complicated—simply upgrade your HP printer or MFP with either of the HP High-Performance Secure Hard Disks that you can install yourself.

Easily install the HP Internal High-Performance Secure Hard Disk into your HP printer or MFP and preserve your EIO slot for extended capabilities, including wireless options and third-party solutions.

With the HP High-Performance Secure EIO Hard Disk, you can avoid the internal installation process and simply insert it into your HP device's EIO slot. The HP lock adapter, included in the box, deters access to the EIO hard disk by allowing you to secure the disk with a separate Kensington-style lock.¹

HP makes managing the hard disks an incredibly simple task. Use the HP Embedded Web Server (EWS) to manage the device or take advantage of HP Web Jetadmin capabilities to manage your fleet of devices.²

Get the quality and reliability you expect with telephone support and a one-year return-to-HP warranty.

¹ Kensington-style lock not included; sold separately.

² Find more information and download HP Web Jetadmin free at www.hp.com/go/webjetadmin.

Technical specifications

	HP High-Performance Secure Hard Disk	HP High-Performance Secure EIO Hard Disk
Part number	J8018A	J8019A
Form factor	Internal 2.5 in disk	EIO disk
Encryption algorithm	AES 128-bit	
What's in the box	HP High-Performance Secure Hard Disk, Documentation CD, Installation guide	HP High-Performance Secure EIO Hard Disk, Documentation CD, Installation guide
Supported devices	HP LaserJet MFP: M4345, M5025, M5035, M9040, M9050; HP Color LaserJet MFP: CM3530; HP Color LaserJet: CP6015; HP Digital Sender: 9250c	HP LaserJet MFP: M3027, M3035, M4345, M4555, M5025, M5035, M9040, M9050; HP Color LaserJet MFP: CM3530, CM4540, CM4730, CM6030, CM6040; HP LaserJet: P3015, P4014, ³ P4015, ³ P4510; ³ HP Color LaserJet: CP3505, ³ CP3525, CP4025, CP4525, CP5525, CP6015; HP Digital Sender: 9250c
Environmental ranges		
Operating temperature	0 to 50° C (32 to 122° F)	
Storage temperature	-5 to 55° C (23 to 131° F)	
Operating humidity	8 to 90% RH	
Non-operating humidity	8 to 90% RH	
Certifications/Validations		
EMC	USA (FCC Title 47, Part 15 Class B), Europe (see DOC), Taiwan (CNS 13438), Australia (AS3548), New Zealand (NZS3548), Korea (EMI law No. 1996-98)	FIPS140-2 validated
Safety	Complies with IEC 60950-1: 2001/EN 60950-1: 2001	
Dimensions (width x depth x height)	8.0 x 10.67 x 1.4 cm (3.15 x 4.2 x 0.55 in)	8.89 x 15.49 x 3.12 cm (3.5 x 6.1 x 1.23 in)
Weight	0.55 kg (0.22 lb)	0.2 kg (0.44 lb)
Warranty	One-year limited hardware warranty	

³ The HP High-Performance Secure EIO Hard Disk supports this device with a CPE firmware of 10.1 or later.
