Overview

The LG E8 OLED TV series features a Picture-on-Glass OLED Display with no backlight, for the most hair raising blacks imaginable. It also comes with a new, Alpha 9 Intelligent Processor designed for LG OLED. Together, they help bring the visual effect of 4K Cinema HDR with Dolby Vision™ to life, for an amazing home entertainment experience.

AI ThinQ™

LG AI ThinQ offers an enhanced interactive experience in the company's new 2018 TV lineup by employing Natural Language Processing (NLP) to deliver intelligent voice-activated control.

α9 (Alpha 9) Intelligent Processor

The new Alpha 9 Intelligent Processor designed for LG OLED, delivers stunning image performance, noise reduction, image enhancement and colour refinement for a next generation visual experience.

OLED Display without Backlight

This state-of-the-art OLED Display generates over a billion rich and beautiful colours. Combine this with no backlight, and you also get the most hair raising blacks imaginable for enhanced contrast.

4K Cinema HDR with Dolby Vision™

4K Cinema HDR delivers a stunning high dynamic range picture, while Dolby Vision™ dramatically enhances the colour and contrast of content frame-by-frame, for a truly cinematic viewing experience.

*Internet connection and subscriptions may be required to access certain content. Internet usage charges and conditions apply. Content, features and ThinQ services will vary from time to time without notice. Video resolution will vary based on internet speed. Check your content and internet provider for full details. Depending on language, voice clarity and available content or source material, voice commands may not always deliver or respond to the requested command.
