- One-touch with NFC-enabled smartphones for Bluetooth pairing
- Stream music wirelessly via Bluetooth™ from your smartphone

Designed for simplicity

- Flexible placement on the wall, tabletop or stand

- Low-rise profile for the perfect fit in front of your TV

Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- Dolby Digital for ultimate movie experience
- Twin tweeters for optimum clarity performance
- Wireless subwoofer adds thrill to the action
- External subwoofer adds thrill to the action

PHILIPS

Features

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Dolby Digital

Because Dolby Digital standards, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

Audio in

Audio in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player or laptop via a simple connection to your Philips home cinema system. Simply connect your audio device to the Audio in jack to enjoy your music with the superior sound quality of the Philips home cinema system.

Specifications

Please note that this is a pre-sales leaflet. The contents of this leaflet reflect the best of our knowledge per date and country mentioned above. The contents of this leaflet are subject to change without notice. Philips does not accept any liability as to the contents of this leaflet.
