winner

PHILIPS

Highlights

Bring light wherever you go

Connect light to your daily life and move it around the way you like it. Philips Hue Go is the most versatile light in your home with up to 300 lumen light output. When plugged into the mains, use it to colour your walls with up to 16 million colours, or choose from any tone of white, from warm to cold, from full brightness to deep dimmed light. Detach it from the mains, and Hue Go becomes a portable centrepiece you can carry to set the mood and bring the best light for your activities. Play with light your way, limited only by your imagination.

Smart battery management

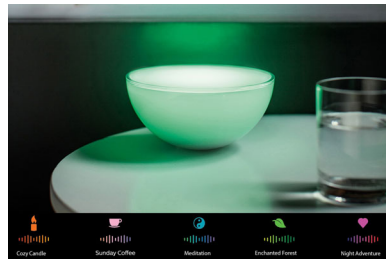

Light spaces in new, creative ways and still enjoy all the connectivity features of Philips Hue. Philips Hue Go is powered by a rechargeable internal battery that can last up to 3 hours after a 1.5 hour charge. Simply unplug Hue Go from the mains and take it anywhere in and around your home. Also in portable mode, Hue Go can be fully controlled with your smart device. The built-in smart battery management guarantees maximum usage.

On product control

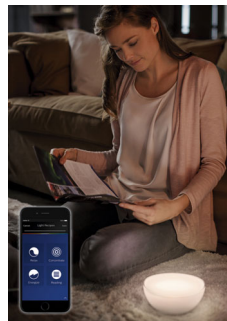

Control Philips Hue Go conveniently and quickly even without your smart device at hand. Activate light settings directly by pressing the smart control on the product. Choose from 7 different light effects: functional warm white light, cool energising daylight, and 5 natural dynamic light effects that match your special moments.

Natural dynamic effects

Philips Hue Go embeds 5 patented natural dynamic effects: Cosy Candle, Sunday Coffee, Meditation, Enchanted Forest, and Night Adventure. Each dynamic effect has its own characteristic flow and mix of colours to set the right mood. Perfect for a romantic dinner, relaxing bath or zen moment.

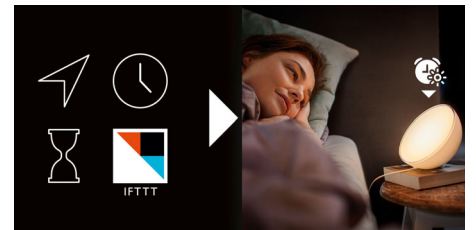

Four light recipes

Get the best light for whatever you do. Philips Hue has captured the optimal light for your

daily activities in four light recipes. "Energise" bathes you in cool and vibrant light for that extra boost. "Concentrate" enables you to focus and get your work done with finely tuned bright white light. "Read" gives the optimal warm white light that does not strain your eyes — perfect for that good read. "Relax" helps you to unwind with a soft glow of warm white light.

Natural wake-up experience

Wake up naturally for a fresh start of each day. Ease your sleeping routine with the most natural wake up experience yet. This Philips Hue light wakes you up in a gentle and natural way. The gradually increasing light intensity gives you the feeling you are waking up with sunlight. You can also programme timers or set Philips Hue to notify you of incoming calls, messages, social media updates, the weather and other relevant communications received through your smart device.

Immersive entertainment light

Enjoy light effects synced to your favourite music, extend your AmbiLight TV experience to the whole room, or lift your gaming experience to the next level with the Philips Hue lights via third party apps.
