Highlights

**Smart Detection System**

The new robot vacuum cleaner is equipped with the Smart Detection System, a combination of smart chips, up to 12 sensors, gyroscope and accelerometer, that makes the robot efficient to clean on its own. The Robot understands the environment and chooses an optimal cleaning strategy to clean your home as quickly as possible. The robot does not get jammed and returns to its docking station when necessary.

**Powerful Li-Ion battery**

The powerful Lithium-ion battery has a longer lifetime and a shorter charging time than standard batteries. The new robot vacuum cleaner runs up to 80 min.

**Scheduling function**

The new robot vacuum cleaner offers a 24 hour scheduling function, so you can program your next cleaning session 24 hours in advance.

**Auto return to base station**

When the battery of the Philips robot vacuum cleaner is almost empty, it will automatically go to the docking station to charge itself, so it will get ready for its next cleaning session.

**2-step cleaning system**

Firstly, the two extra long side brushes swipe dirt and dust into the path of the robot. Secondly, the nozzle picks up all dirt and dust from your floors, thanks to its powerful motor.

**Dust Sensor**

The dust sensor feature enables the robot to automatically recognize the areas where most dust is accumulated, so it stays in that area for a few seconds more to have a deeper cleaning.

**Slim design**

With its slim design at only 6 cm of height, the robot can easily reach low areas and remove the dust accumulated under your furniture.

**Contour following nozzle**

The robot vacuum cleaner comes with a movable nozzle that follows the contours of the floors, carpets, rugs, etc. to ensure accurate cleaning results.
