**Highlights**

**200 Watt infrared halogen lamp**

The Philips InfraCare HP 3621 has been optimised for effective relief of pains in areas covering 20 x 30 cm, for example shoulder, elbow, calf, or neck. The InfraCare features innovative infrared halogen lamp technology. The special optics, filter and the powerful halogen lamp of 200 Watt have been optimised to provide a clear focused treatment as the infrared warmth is more equally divided over the treatment area.

**Adjustable angle**

The infrared lamp can easily be positioned up to 40 degrees backwards.

**Deep penetrating Infrared warmth**

Infrared light has been proven to effectively relieve aches and pains caused by muscular pains and stiff joints. The comfortable warmth created by infrared light penetrates deep into your skin, stimulates blood circulation and warms your muscles. As your muscles are soothed, they automatically loosen up and relax. Because it makes the tissue more pliable, warmth also reduces stiffness and makes joints more flexible.
