Highlights

100% ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

4 beverages

Enjoy your favourite drinks for your special moments. Whether you crave for an espresso, a cofffee or a milk based recipe, your Super-automatic machine delivers a perfect in-cup result with no hassle and in no time!

AquaClean filter

AquaClean

AquaClean is our patented water filter, designed to improve the quality of your coffee by purifying water. It also prevents scale build-up in the water circuit of your coffee machine: make up to 5000* cups without descaling by replacing the filter regularly.

Automatic Milk Frother

Preparing a velvety cappuccino is easy thanks to the Automatic Milk Frother. The milk frother, which baristas also call "cappuccinatore", will draw the milk directly from a carton or jug, froth it automatically and dispensing it into your cup with a constant flow of milk without any splashing.

Auto-Rinse & Guided descaling

This espresso machine automatically cleans its coffee circuit with water upon starting up or switching off of the machine, this delivers a great, fresh taste with each cup of coffee.Regular descaling prolongs your espresso machine's life. This machine will prompt when descaling is needed. It will guide you with on-screen messages what you have to do and when.

Customize your coffees

This Super-Automatic machine offers an abundance of indulgent options to customize your beverage to your taste. You can easily personalize and memorize length, strength and temperature for each drink. Feel free to explore, experiment and dream up any drink!

High capacity & compact design

Enjoy more room and go longer without refill thanks to the high-capacity bean, water, and waste containers in a super-compact design. This smart, super-automatic machine provides you with maximum convenience and top notch performance thanks to a large capacity water tank, bean and waste container.
