** vs all other Philips Automatic Espresso machines
**** When compared to previous Philips espresso machines
****** Based on 8 filter replacements as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns

Café-quality results with BrewExtract technology, Velvety milk froth with LatteGo Pro, 50+ hot and cold drinks for every mood, Hassle-free cleaning, Easy-to-use intuitive display

EP8757/20

Highlights

BrewExtract technology

The secret to café-like intensity? Our BrewExtract technology doses and presses more beans* into every brew to create that unmistakable café-like taste from your espresso machine. Want to make it just right? Tweak your brew using one of 7 intensity levels.

LatteGo Pro

Café-quality results also mean velvety milk froth, hot or cold. That's where LatteGo Pro comes in. From cappuccino to iced latte, our milk system delivers café-quality results using both dairy and plant-based milks. It's dishwasher safe and no tubes means you can clean it in 10 seconds rinsing under running water. Experience next-level froth with LatteGo Pro: the innovative milk frother in our coffee machine system.

50+ hot and cold drinks

Explore 50+ hot and cold coffee creations, from rich espressos to refreshing cold brews. This hot and iced coffee maker is the perfect solution for families and coffee lovers seeking café-level variety at home.

Hassle-free cleaning

Clean LatteGo Pro in 10 seconds by rinsing under running water or place it in the dishwasher. The brew unit can be cleaned under the tap. When it's time to run a cleaning programme, like descaling, your machine will guide you through it.

Easy-to-use intuitive display

The intuitive touch TFT 4.3" display ensures effortless coffee making with one-touch brewing and personalised user profiles. Simple controls make it easy for everyone in the household to enjoy premium coffees at home.

Barista assistant

Meet your barista assistant, the helper that strives to make your coffee better, every day. You can use it on your machine or in the HomeID app. Chat and tell which beans you're using, and it will automatically adjust the brew settings so you get the best extraction from your beans. With barista assistant, you can adjust the strength, volume or temperature to suit your taste – even when brewing remotely. It's always at your service, so every cup feels like it was made by a real barista in your own kitchen.

Machine with Cold Brew

Experience refreshing cold brew at the press of a button - well-balanced and smooth, ready on demand.

SilentBrew technology

Our patented SilentBrew technology reduces machine sound, making it easier to enjoy the simple delight of brewing coffee. Using sound shielding and quiet grinding, our machines make 40% less noise than earlier models and comes with a Quiet Mark certification.

Fresh Beans

Café-quality coffee starts with freshly ground beans. Add your favourite beans, select your coffee and let the integrated grinder release that irresistible aroma and flavour. Fine-tune the grind size using of one of 12 settings, from fine to coarse.

Specifications

Energy efficiency

Standby mode power consumption: 0.2 W
